joanmascarell.dev

Designer, crafting UI for the web. Master's grad, specializing in frontend development, building on a bachelor's in digital design. I recently interned at [Okisam](#), a solution-driven design agency, developing my first component-based CSS design system from scratch.

Skills

Development

HTML, CSS, JavaScript, TypeScript, PowerShell, Git, Node.js, React, Next.js, Storybook.

Design & Editing

Figma, Adobe Creative Suite (Illustrator, Photoshop, InDesign), WordPress

Credentials

Pearson

Critical Career Skills - Generative AI Foundations

[Issued Jul. 2026](#) · [Valid until Jul. 2031](#)

Universidad Internacional de La Rioja (UNIR)

Advanced University Program in Component-Based Web Development

[May 2026](#)

Trinity College London

ISE II, CEFR Level B2

[Sept. 2019](#)

Education

Universidad Internacional de La Rioja (UNIR)

Master's Degree in Frontend Development

[Oct. 2025](#) – [Sept. 2026](#)

Universitat de Lleida - EPS

Bachelor's Degree in Digital Design

[Sept. 2021](#) – [Nov. 2024](#)

Experience

Development Department (frontend) — Academic Internship

Okisam, Benetússer, Valencia, Spain

[Feb. 2026](#) – [May 2026](#)

- **Built and implemented web interfaces in WordPress using Elementor**, translating Figma designs into production and ensuring a faithful, responsive implementation across devices, supported by Figma Dev Mode and Chrome DevTools.
- **Developed custom CSS and JavaScript** to cover design needs beyond the visual builder's capabilities, gaining technical autonomy progressively.
- **Led the creation of a reusable component system in WordPress/Elementor**, reviewing and reorganizing custom CSS (component-specific vs. global styles) to improve code scalability, and documented the structure with the development team.

Web Designer — Academic Internship

Ingenio, Remote

[Oct. 2023](#) – [Mar. 2024](#)

Carried out the full migration of the corporate website to WordPress, improving its design, accessibility and performance, and kept the content updated and relevant for the target audience.

Projects

Master's Thesis — E-commerce UX/UI Redesign

Next.js · React · TypeScript

[Sept. 2026](#)

Heuristic evaluation (Nielsen heuristics) and design of UX components (*Trust Bar*, *Product Card*, *Cart Drawer*, *Checkout Trust Layer*) aimed at improving trust and conversion.

Bachelor's Thesis — embassaments-cat

D3.js · Observable · JavaScript

[Nov. 2024](#)

Built an interactive application to visualize the state of Catalonia's internal river basins, including data sourcing and cleaning.
